## About the Aesthetic Society

The American Society for Aesthetic Plastic Surgery (ASAPS) was founded in 1967 when cosmetic surgery was only beginning to be recognized as the important subspecialty it is today.

Founded on a mission of education, we are now widely recognized as the leader in cosmetic surgery research, education, and procedural advances.

United States membership to the Aesthetic Society® is restricted to American Board of Plastic Surgery certified physicians who meet a minimum number of surgical procedures performed and commit to a significant number of continuing medical education hours. New members must be sponsored by a current Society member.

Other health care providers may also provide some of these services, therefore cosmetic procedures surgical and nonsurgical are performed by a variety of physicians. For that reason, we rely on physicians from many different specialties when we compile our annual statistics. We thank these clinicians for their contributions to our survey.

# About the ASAPS Cosmetic Surgery National Data Bank

ASAPS, working with an independent research firm, compiled the 16-year national data for procedures performed 1997-2012. A paper-based questionnaire was mailed to 23,000 Board-Certified physicians (9,300 Dermatologists, 8,300 Otolaryngologists, and 5,400 Plastic Surgeons).

An online version of the questionnaire was also available. A total of 837 physicians returned questionnaires, of which 65 were retired or otherwise inactive during 2012. Of the 772 active respondents, the sample consisted of 365 Plastic Surgeons, 286 Dermatologists, and 121 Otolaryngologists).

Final figures have been projected to reflect nationwide statistics and are based exclusively on the Board-Certified Plastic Surgeons; Otolaryngologists; and Dermatologists. The findings have been aggregated and extrapolated to the known population of 25,750 active physicians who are Board Certified in these specialties. Though the confidence intervals change by procedure, depending on the grouping's sample size and the response variance, the overall survey portion of this research has a standard error of +/- 3.47% at a 95% level of confidence.

The Survey on Cosmetic Procedures

## Ouick Facts: Highlights of the ASAPS 2012 Statistics on Cosmetic Surgery

- There were over 10 million surgical and nonsurgical cosmetic procedures performed in the United States in 2012. Surgical procedures accounted for 17% of the total number of procedures and 61% of the total expenditures, with nonsurgical procedures making up 83% of the total number of procedures and 39% of total expenditures.
- From 2011-2012, there was a 3.1% increase in the total number of cosmetic surgical procedures, with almost 1.7 million surgical procedures performed this past year.
- The most popular surgical procedure in 2012 was breast augmentation. In 2006, 383,886 breast augmentation procedures were performed and of those 81% used saline implants and 19% used silicone. In 2012, 330,631 breast augmentation procedures were performed and of those only 28% used saline implants and 72% used silicone.
- Since 1997, there has been almost a 250% increase in the total number of cosmetic procedures. Surgical procedures increased by more than 80%, and nonsurgical procedures increased by 461%.

- The top five cosmetic surgical procedures in 2012 were: breast augmentation (330,631 procedures); liposuction (313,011 procedures); abdominoplasty (156,508 procedures); blepharoplasty (153,171 procedures); rhinoplasty (143,801 procedures).
- The top five nonsurgical cosmetic procedures in 2012 were: Botulinum Toxin Type A (3,257,913 procedures); hyaluronic acid (1,423,705 procedures); laser hair removal (883,893 procedures); microdermabrasion (498,821 procedures); chemical peel (443,824 procedures).
- When procedures performed by physician assistants and nurse injectors are included, the total number of cosmetic surgical and nonsurgical procedures performed in the United States in 2012 increases to over 12.6 million.
- For the second year in a row this survey asked the doctors for the total number of non-surgical procedures being performed in their practices by BOTH physicians and their physician assistants and nurse injectors.

  The TOTAL number of procedures performed in the practices surveyed: Botulinum Toxin Type A (4,125,179); Hyaluronic Acid (1,806,806); Laser Hair Removal (1,224,920); and Chemical Peel (718,465); and Microdermabrasion (672,430).

- Women had more than 9.1 million cosmetic procedures, 90% of the total.
   The number of cosmetic procedures for women increased over 252% from 1997.
- The top five surgical procedures for women were: breast augmentation, liposuction, tummy tuck, eyelid surgery, and rhinoplasty.
- Men had almost 1 million cosmetic procedures, 10% of the total. The number of cosmetic procedures for men increased over 106% from 1997.
- The top five surgical procedures for men were: liposuction, rhinoplasty, eyelid surgery, breast reduction to treat enlarged male breast, and otoplasty (ear surgery).

Americans spent almost \$11 billion on

cosmetic procedures in 2012.

Of that total \$6.7 billion was spent on surgical procedures; \$2 billion was spent on injectables procedures; \$1.8 billion was spent on skin rejuvenation procedures; and over \$483 million was spent on other nonsurgical procedures, including laser hair removal and laser treatment of leg veins.

- People age 35-50 had the most procedures – over 4 million and 43% of the total. People age 51-64 had 29%; age 19-34 had 19% of procedures; age 65 and over had 8 %; and age 18 and younger had 1%.
- The most common surgical procedure for people age 35-50 was lipoplasty; for people age 51-64 it was blepharoplasty; for people age 19-34 it was breast augmentation; for people age 65 and over it was facelifts. For all four of these age categories the most popular nonsurgical procedure was injections of Botulinum Toxin Type A.
- Racial and ethnic minorities, as of last year, had approximately 21% of all cosmetic procedures: Hispanics, 8%; African-Americans, 7%; Asians, 5%; and other non-Caucasians, 2%.
- Where cosmetic surgeries were performed: office facility, 59%; free-standing surgicenter, 24%; and hospital, 15%.

#### **Quick Facts**

- Hyaluronic Acid <u>injectables</u> (including Hyalform, Juvederm, Perlane/ Restylane) have quickly been gaining in popularity. ASAPS added Hyaluronic Acid to the survey in 2004, and in 2012 these procedures are only 2nd in popularity to Botox.
- For the second year in a row this survey asked the doctors for the total number of non-surgical procedures being performed in their practices by BOTH physicians and their physician assistants and nurse injectors.

  The TOTAL number of procedures performed in the practices surveyed: Botulinum Toxin Type A (4,125,179); Hyaluronic Acid (1,806,806); Laser Hair Removal (1,224,920); and Chemical Peel (718,465); and Microdermabrasion (672,430).
- When procedures performed by physician assistants and nurse injectors are included, the total number of cosmetic surgical and nonsurgical procedures performed in the United States in 2012 increases to over 12.6 million

<sup>\*</sup> Breast reduction may be covered by insurance, depending on terms of the policy and individual patient factors.

Hair transplantation was excluded from the results, due to an insufficient sample of physicians who perform the procedure.

- \* Breast reduction may be covered by insurance, depending on terms of the policy and individual patient factors. Fees may vary.
- \*\* Figures are for physician/surgeon fees only and do not include fees for the surgical facility, anesthesia, medical tests, prescriptions, surgical garments, or other miscellaneous costs related to surgery. Figures for procedures often performed on more than one site in the same session reflect typical fees for one site.

Hair transplantation was excluded from the results, due to an insufficient sample of physicians who perform the procedure.

#### RealSelf Worth It Rating

The RealSelf Worth It Rating reflects the combined opinions of thousands of RealSelf community members. Each member shares whether an elective surgery or treatment was "worth it" all things considered. Worth It Ratings are expressed as a percentage, for example, an 80% Worth It Ratings means 8 out of 10 patients would do it again.

#### RealSelf

RealSelf.com is the most visited online community for learning about and sharing information and results for medical-beauty treatments. Dedicated to helping people make suitable and empowered elective decisions, the site features consumer reviews, Worth It Ratings, pricing information, and thousands of before and after photographs that collectively tell the 'real story.'
