WE ARE
AESTHETICS.

ASAPS Spokesperson Network

- Thought and opinion leaders in all types of cosmetic procedures, (surgical and nonsurgical), are available for interviews and information
- Spokespersons are available nationwide in urban and rural settings
- ASAPS leadership is available for information and interviews in all major cosmetic surgery markets
- All Aesthetic Society® spokespersons are working clinicians in direct patient care

Contact The Aesthetic Society® Communications Office at 562.799.2356 or e-mail media@surgery.org for prompt assistance.

The Media Center at <http://www.surgery.org/media>

- Downloadable statistics and full color graphs
- Aesthetic Society® “procedures at a glance”
- Complete library of press releases ranging from 1998 to the most recent releases are also indexed by subject
- Frequent posting of new information, position statements and news releases
- Automatic email notification of new postings available on request (please contact media@surgery.org)

Other Resources for the Media

- Before and after patient photos
- Video – B roll, news packages and video news releases
- Invited media attendance at ASAPS Scientific Meetings

About The Aesthetic Society

The American Society for Aesthetic Plastic Surgery (ASAPS) was founded in 1967 when cosmetic surgery was only beginning to be recognized as the important subspecialty it is today.

Founded on a mission of education, we are now widely recognized as the leader in cosmetic surgery research, education, and procedural advances.

United States membership to The Aesthetic Society® is restricted to American Board of Plastic Surgery certified physicians who meet a minimum number of surgical procedures performed and commit to a significant number of continuing medical education hours. New members must be sponsored by a current Society member.

Other health care providers may also provide some of these services. Therefore, cosmetic procedures (surgical and nonsurgical) are performed by a variety of physicians. For that reason, we rely on physicians from many different specialties when we compile our annual statistics. We thank these clinicians for their contributions to our survey.

ASAPS, working with an independent research firm, compiled the 18-year national data for procedures performed from 1997-2014. A paper-based questionnaire was mailed to 30,000 board-certified physicians (12,000 dermatologists, 10,500 otolaryngologists, and 7,500 plastic surgeons). An online version of the questionnaire was also available. A total of 901 physicians returned questionnaires, of which 115 were retired or otherwise inactive during 2014. Of the 786 active respondents, the sample consisted of 317 plastic surgeons, 315 dermatologists, and 154 otolaryngologists.

Final figures have been projected to reflect nationwide statistics and are based exclusively on the board-certified plastic surgeons, otolaryngologists and dermatologists. The findings have been aggregated and extrapolated to the known population of 27,600 active physicians who are board-certified in these specialties. Though the confidence intervals change by procedure, depending on the grouping's sample size and the response variance, the overall survey portion of this research has a standard error of +/- 3.45% at a 95% level of confidence.

The Survey on Cosmetic Procedures Performed in 2014 was compiled, tabulated and analyzed by Industry Insights Inc. (www.industryinsights.com), an independent research firm based in Columbus, OH.

Quick Facts: **Highlights** of the ASAPS 2014 Statistics on Cosmetic Surgery

- There were more than 10 million surgical and nonsurgical cosmetic procedures performed in the United States in 2014. Surgical procedures accounted for 60% of the total expenditures and nonsurgical procedures accounted for 40% of the total expenditures.
- Americans have spent more than 12 billion dollars during each calendar year in 2013 and 2014 on combined surgical and nonsurgical procedures – the most money spent on elective aesthetic cosmetic procedures since 2008.
- The most popular surgical procedure in 2014 was Liposuction with 342,494 procedures performed. Breast Augmentation was the second most popular surgical procedure with 286,694 procedures performed.
- Buttock Augmentation procedures increased in number by 86% in 2014 and Labiaplasty increased by 49% in 2014.
- 80% of breast implants used in 2014 were silicone and 20% were saline.
- While some of the nonsurgical procedures saw decreases in 2014, Nonsurgical Fat Reduction was a standout with a 43% increase in 2014.
- Since 1997, there has been a 274% increase in the total number of cosmetic procedures. Surgical procedures increased by 82% and nonsurgical procedures increased by 508%.
- While certain breast procedures including Augmentation were down in 2014, Breast Revisions were way up, by 30%, which may be attributed to the fact that implants are not forever devices, despite popular belief.
- The top five cosmetic surgical procedures in 2014 were: Liposuction (342,494 procedures), Breast Augmentation (286,694 procedures), Eyelid Surgery (165,714 procedures), Tummy Tuck (164,021 procedures), and Nose Surgery (145,909 procedures).
- The top five nonsurgical procedures were: Botulinum Toxin (3,588,218 procedures), Hyaluronic Acid (1,696,621 procedures), Hair Removal (828,480 procedures), Chemical Peel (484,053 procedures) and Microdermabrasion (417,034 procedures).
- When procedures performed by physician assistants and nurse injectors are included, the total number of cosmetic non-invasive procedures performed in the United States in 2014 increases to over 13 million.
- For the fourth year in a row, ASAPS' annual survey asked doctors for the total number of nonsurgical procedures being performed in their practices by physicians, their physician assistants and nurse injectors. The total number of procedures performed in the practices surveyed: Botulinum Toxin Type A (4,606,728), Hyaluronic Acid (2,032,238), Hair Removal (1,080,082), Chemical Peel (690,144) and Microdermabrasion (636,003).
- Women had more than 9.6 million cosmetic procedures, 90% of the total. The number of cosmetic procedures for women increased over 429% from 1997.
- The top five surgical procedures for women were: Liposuction, Breast Augmentation, Tummy Tuck, Eyelid Surgery and Breast Lift.
- Men had more than 1 million cosmetic procedures performed - 10% of the total. The number of cosmetic procedures for men has increased over 273% from 1997.
- The top five surgical procedures for men were: Liposuction, Nose Surgery, Eyelid Surgery, Male Breast Reduction and Facelift.
- People age 35-50 had the most procedures performed – over 4.2 million and 40.1% of the total. People age 51-64 had 31%, age 19-34 had 17.2%, age 65 and over had 10.4%, age 18 and under had 1.3%.
- The most common surgical procedure for people age 35-50 was Liposuction, age 51-64 it was Liposuction, age 19-34 it was Breast Augmentation, age 65 and over it was Facelift, age 18 and under it was Ear Surgery.
- Racial and ethnic minorities had approximately 22% of all cosmetic procedures: African-Americans (7.1%), Asians (5.1%), Hispanics (8.3%), and other non-Caucasians (1.3%).
- Where cosmetic surgeries were performed: Office facility (56.3%), hospital (17.2%), and free-standing surgical center (26%).

Quick Facts

- For the past two years, the order of the top five surgical procedures in terms of popularity has remained consistent.
- Chemical Peels were once again featured in the top five nonsurgical procedures category, edging out Photorejuvenation from the top five completely and surpassing Microdermabrasion in popularity.
- Botulinum Toxin has been the #1 nonsurgical procedure since 2000.

2014 National Totals for Cosmetic Procedures - Surgical

The following list includes national totals for surgical cosmetic procedures. The top 5 surgical procedures are indicated in bold superscript numbers in the column headed Number of Procedures. The rankings of procedures by surgical category are labeled as such.

	Procedure	Number of Procedures	2014 Rank within Category (Surgical)	2009 Rank within Category	2004 Rank within Category
Surgical	Breast Augmentation*	286,694 ²	2	1	2
	Breast Lift	132,908	6	7	8

2014 National Totals for Cosmetic Procedures - Nonsurgical

The following list includes national totals for nonsurgical cosmetic procedures. The top 5 nonsurgical procedures are indicated in bold superscript numbers in the column headed Number of Procedures. The rankings of procedures by nonsurgical category are labeled as such.

Nonsurgical	Procedure	Number of Procedures	2014 Rank within Category (Nonsurgical)	2009 Rank within Category	2004 Rank within Category
	Injectables:				
	Botulinum Toxin (including Botox, Dysport, Xeomin)	3,588,218 ¹	1		
	Calcium Hydroxylapatite (Radiesse)	133,059	11		
	Hyaluronic Acid (incl. Juvederm Ultra, Ultra Plus, Voluma, Perlane, Restylane, Belotero)	1,696,621 ²	2		
	Poly-L-Lactic Acid (Sculptra)	79,313	13		
	Totals - Injectables	5,497,212			
	Skin Rejuvenation:				
	Chemical Peel	484,053 ⁴	4		
	Dermabrasion (not including microdermabrasion)	25,369	15		
Nonsurgical	Full Field Ablative (laser skin resurfacing)	408,433	6		
	Micro-Ablative Resurfacing (fractional resurfacing)	84,833	12		
	Microdermabrasion	417,034 ⁵	5		
	Nonsurgical Skin Tightening (incl. Ulthera, Thermage, Pelleve)	298,223	9		
	Photo Rejuvenation (IPL)	370,497	7		
	Totals - Skin Rejuvenation	2,088,442			
	Other:				
	Hair Removal (laser or pulsed light)	828,480 ³	3		
	Nonsurgical Fat Reduction (incl. CoolSculpting, Vaser Shape, Liposonix)	135,448	10		
	Sclerotherapy	315,707	8		
Nonsurgical	Tattoo Removal	33,363	14		
	Totals - Other Nonsurgical Procedures	1,312,998			
	Totals - Nonsurgical Procedures	8,898,652			

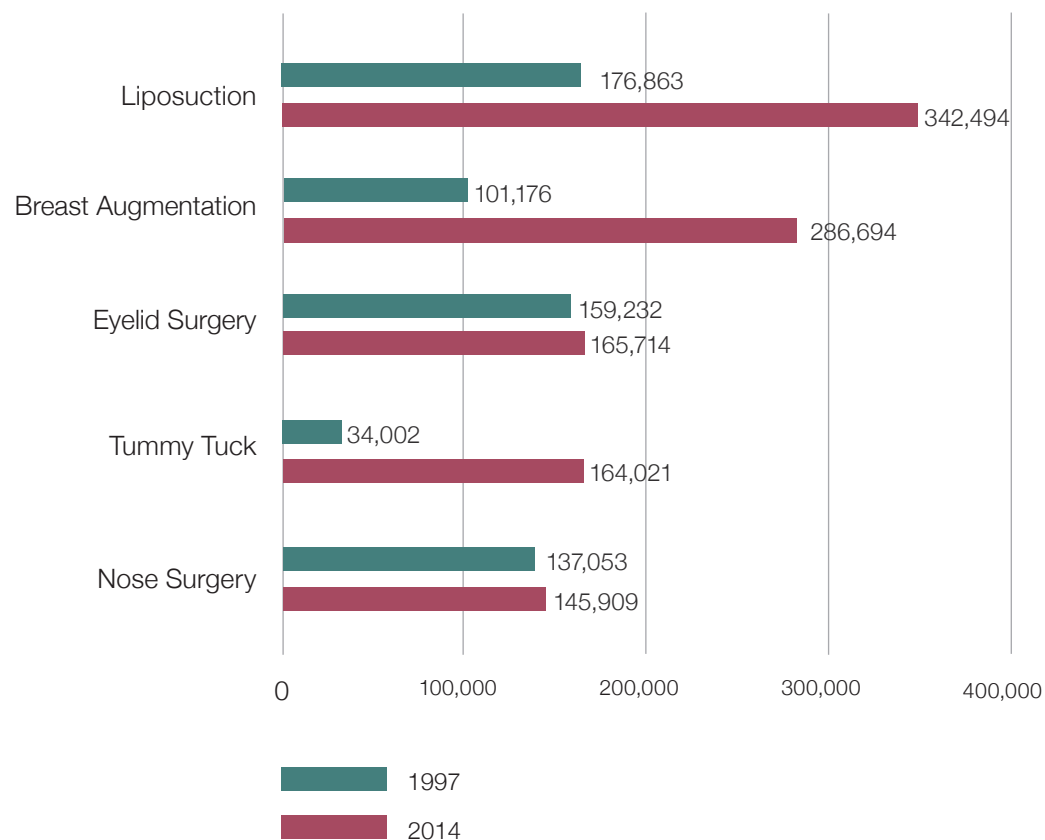

Notes

- Botulinum Toxin, (Botox, Dysport and Xeomin) and Hyaluronic Acid, (Juvederm Ultra, Ultra Plus, Voluma, Perlane, Restylane and Belotero) have maintained the #1 and #2 spots for most popular nonsurgical procedures for six years running.
- While Nonsurgical Fat Reduction is not featured in the top 5 most popular nonsurgical procedures list, it too was a standout in 2014 with a 42% increase in the number of procedures performed in 2014.

x = Rankings for this procedure in prior years is not available. Prior year rankings have been adjusted for equal comparison.

Hair Transplantation, Polymethylmethacrylate, Cellulite Treatment, and Treatment of Leg Veins were excluded from the results, due to an insufficient sample of responding physicians who perform those procedures.

Source: American Society for Aesthetic Plastic Surgery

Notes

- In the past 18 years, the number of cosmetic procedures for men has increased more than 273% and the number of cosmetic procedures for women has increased more than 429%.
- People age 35 - 50 had the most procedures performed - over 4.2 million and 40.1% of the total.
- Liposuction, the most popular surgical procedure in 2014, has seen a 94% increase in the number of procedures performed since ASAPS initiated its survey in 1997.

Percent of Change in Select Procedures: 1997 - 2014 - Surgical

Note that large percentage changes are common in cases where the total number of procedures is small.

	Upper Arm Lift	\$4,370	\$99,754,034
Total - Surgical Procedures			\$7,472,027,593

* Breast Reduction may be covered by insurance, depending on terms of the policy and individual patient factors. Fees may vary.

Figures for procedures include but are not limited to those performed by ASAPS members. ASAPS members are plastic surgeons certified by the American Board of Plastic Surgery who specialize in cosmetic surgery of the face and the entire body. Figures are for physician/surgeon fees only and do not include fees for the surgical facility, anesthesia, medical tests, prescriptions, surgical garments, or other miscellaneous costs related to surgery. Figures for procedures often performed on more than one site in the same session reflect typical fees for one site.

Component figures may not add exactly to totals and percentages may not equal 100% due to rounding.

Upper Body Lift was excluded from the results, due to an insufficient sample of responding physicians who perform that procedure.

ASAPS Procedure Quick Facts

Surgical Procedures	Best Candidate	Physician/Surgeon Fees*	Length of Procedure	Number of Treatments	Back to Work
Breast Augmentation (saline) Breast Augmentation (silicone)	Small breasts, breast asymmetry	\$3,441 \$3,848	1-2 hours	One	1-2 weeks
Breast Lift	Sagging, poorly shaped breasts	\$4,552	1 1/2-3 1/2 hours	One	1-2 weeks
Breast Reduction	Large, heavy, pendulous, or disproportionate breasts	\$5,521	2-4 hours	One	1-2 weeks
Brow Lift	Sagging, low eyebrows, forehead creases, frown lines	\$3,174	1-2 hours	One	Within 10 days
Buttock Augmentation	Weight loss or minimal volume buttock	\$4,194	1-2 hours	One	1 week
Buttock Lift	Sagging skin, excess fat, weakened muscles in thigh/buttocks area	\$5,351	2 hours	One	2-4 weeks
Chin Augmentation/ Genioplasty	Receding chin	\$2,515	1 hour	One	1-2 weeks
Ear Surgery	Protruding or disproportionate ears	\$2,976	2-3 hours	One	5-14 days
Eyelid Surgery	Excess fat, wrinkled or drooping skin, upper eyelids, bags, puffiness under eyes	\$2,981	1-3 hours	One	Within 10 days
Facelift	Loose skin, deep lines, wrinkles, jowls	\$7,022	2-3 hours	One	Within 2 weeks
Labiaplasty	Enlarged labia minora, often asymmetric, often protrudes beyond the labia majora	\$2,576	1 hour	One	1 week
Liposuction (various techniques)	Normal weight with isolated fatty areas	\$3,099	45 minutes - 2 hours	One	1-2 weeks
Lower Body Lift	Laxity of thighs, buttock, and abdomen	\$7,717	Up to 8 hours	One	Up to 4 weeks
Male Breast Reduction	Gynecomastia	\$3,422	2 hours	One	1 week
Nose Surgery	Nose too large, wide, or tip needs reshaping, deformity after trauma	\$4,757	1-2 hours	One	7-10 days
Thigh Lift	Loose, excess skin	\$5,016	2 hours	One	2-4 weeks
Tummy Tuck	Protruding abdomen, excess fat and skin, weak abdominal muscles	\$5,638	2-5 hours	One	2-4 weeks
Upper Arm Lift	Excess skin and fat on underside of arm	\$4,370	2 hours	One	1-2 weeks

* National average; surgeon fees are based on ASAPS 2014 Statistics. Fees vary considerably by geographic region. Facility fees, anesthesia and other surgical costs not included.

** With any surgical procedure, a revision or touch-up may sometimes be necessary.

ASAPS Quick Facts

- The American Society for Aesthetic Plastic Surgery (ASAPS)
- Founded in 1967
- Primary mission: education and research in cosmetic plastic surgery
- Over 2,600 members, mostly in the U.S. and Canada
- International members in 38 countries
- U.S. members are plastic surgeons certified by the American Board of Plastic Surgery (in Canada, by the Royal College of Physicians and Surgeons of Canada) and specializing in cosmetic surgery of the face and body
- Accredited sponsor of cosmetic surgery Continuing Medical Education (CME) for qualified plastic surgeons since 1974
- Sponsor of the Cosmetic Surgery National Data Bank since 1997
- Peer-reviewed publication: [*Aesthetic Surgery Journal*](#), the world's most widely read clinical journal of cosmetic surgery
- Members must perform a minimum number of aesthetic cases to be eligible for membership and perform all surgical procedures in an accredited facility
- All members, due to their extensive training in anatomy of the face and body, are uniquely qualified to perform both surgical and non-invasive procedures
- The Aesthetic Meeting has long been considered the premier educational event for board-certified plastic surgeons. Its attendance is restricted to this physician group

WE ARE
AESTHETICS.

➤ The Aesthetic Society has a number of websites devoted to consumers, (to help them make informed decisions), physicians and media.

➤ For Consumers:

www.smartbeautyguide.com (Procedural info, physician Q&As, blogs, surgeon locator and more)

www.breastimplantsafety.org (For unbiased, science-based information on breast implant options)

www.injectablesafety.org (The web presence of the Physicians Coalition for Injectable Safety)

➤ For Physicians and Media:

www.surgery.org (For annual statistics, press releases and news)
